

Multiple Choice (40 marks)

1. Insider trading undermines the fiduciary relationship.
 - (a) 1,2,3
 - (b) 1,2,4
 - (c) 2,3,4
 - (d) 1,2,3,4
2. Given the following major premise, which of the following minor premises could lead to a valid conclusion? "Either I'm going to do well on this test or I'm..."
 - (a) "I won't do well on the test"
 - (b) "I won't take the test"
 - (c) "My birthday is today"
 - (d) both A and B
3. An immigrant learning English in the United States is an example of
 - (a) structural assimilation.
 - (b) amalgamation theory.
 - (c) acculturation.
 - (d) adaptation.
4. Which of the following structures is derived from ectomesenchyme?
 - (a) Motor neurons
 - (b) Skeletal muscles
 - (c) Melanocytes
 - (d) Sweat glands
5. Which of these is the BEST reason to study weather?
 - (a) To be prepared for storms
 - (b) To learn how fossils are formed
 - (c) To see changing phases of the Moon
 - (d) To find ways for animals to live longer
6. In Islam, what is the qiblah?
 - (a) Almsgiving

- (b) Pilgrimage
 - (c) Direction of prayer
 - (d) Revelation
7. What is an urgent reason for catheterizing a patient?
- (a) Acute urinary retention.
 - (b) Urinary tract infection.
 - (c) Incontinence.
 - (d) Because they asked.
8. Which one of the following would be a plausible response to a finding of residual non-normality?
- (a) Use a logarithmic functional form instead of a linear one
 - (b) Add lags of the variables on the right hand side of the regression model
 - (c) Estimate the model in first differenced form
 - (d) Remove any large outliers from the data.
9. The normal pH of the cytosol is about 7.2. Most enzymes in the lysosome, however, are only active at a pH of 5. This suggests that
- (a) only acidic substances can undergo enzymatic processing in lysosomes
 - (b) most enzymes in the lysosome are incapable of catalyzing substrates inside the lysosome
 - (c) enzymes in the lysosome are released to the cytosol
 - (d) protons are actively pumped into the lysosome
10. Hypernatraemic dehydration is:
- (a) water intake is less than is needed to maintain balance.
 - (b) water intake is more than is needed to maintain balance.
 - (c) blood volume is lost due to trauma or burns.
 - (d) blood volume is lost due to surgery.
11. As humans travel in space, which gas is provided in the atmosphere of the spacecraft and which gas is removed from the atmosphere of the spacecraft?
- (a) Oxygen is provided. Carbon dioxide is removed.
 - (b) Carbon dioxide is provided. Oxygen is removed.
 - (c) Carbon dioxide is provided. Nitrogen is removed.
 - (d) Oxygen is provided. Nitrogen is removed.

12. A scientist combines oxygen and hydrogen to form water. This combination illustrates that water is
- (a) an atom.
 - (b) an element.
 - (c) a mixture.
 - (d) a compound.
13. Which statement best explains Earth's day and night cycle?
- (a) Earth rotates once each day on its axis.
 - (b) Earth revolves around the Sun each year.
 - (c) The Sun is closest to Earth during the day.
 - (d) The tilt of Earth changes throughout the year.
14. Job satisfaction appears to be most negatively correlated with
- (a) intelligence level
 - (b) turnover rate
 - (c) isolation from colleagues
 - (d) educational level
15. The star that Jupiter revolves around is the source of solar energy called
- (a) sunlight
 - (b) moonlight
 - (c) ultraviolet light
 - (d) fluorescent light
16. Which of the following best measures changes in the price level of national product?
- (a) The consumer price index
 - (b) The real interest rate
 - (c) The unemployment rate
 - (d) The GDP deflator
